*4023 Plovdiv (Bulgaria)*

# **ABOUT US**

TRETECH LTD was founded as a spin-off of IBME LTD Bulgarian company founded in 2000 by an Italian company with the aim to develop their business in the automotive sector.

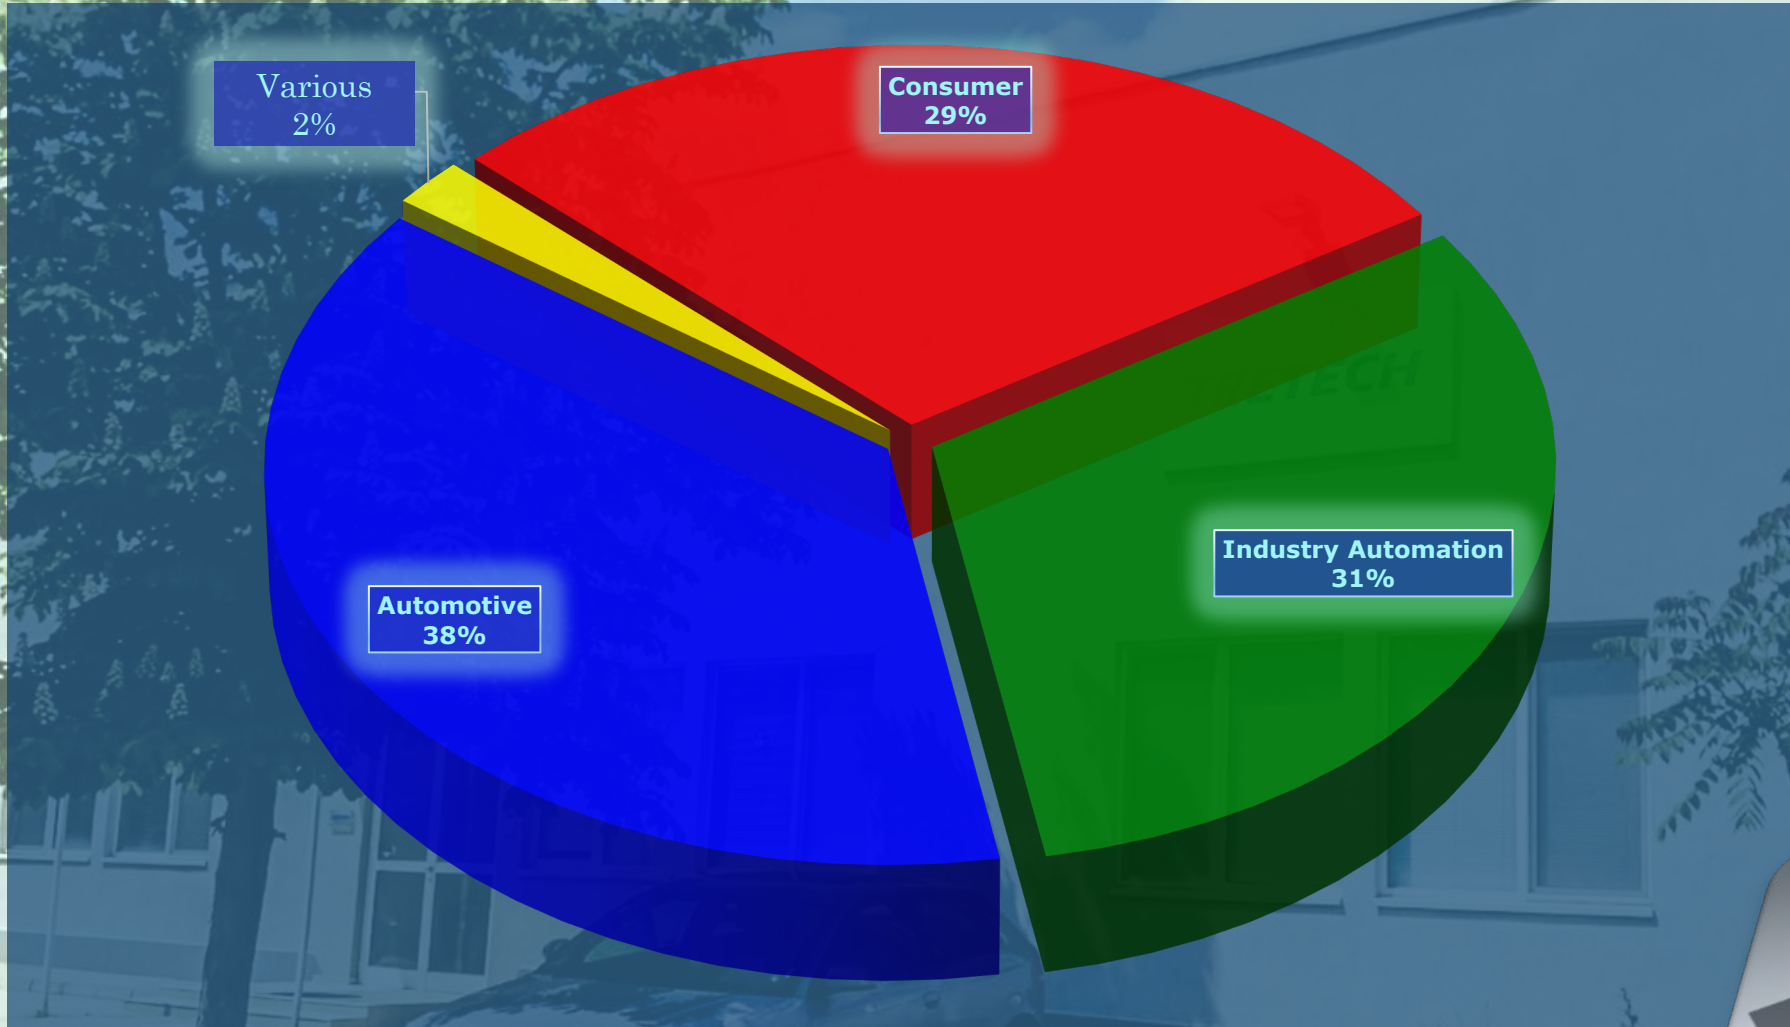

In 2013, the IBME Plant Manager, already operating in Bulgaria from the first year of settlement, together with other Italian shareholders, decides to give birth to a new industrial project that sees a Bulgarian company direct protagonist in the market; a market more and more hungry for skilled labor at low cost

TRETECH becomes immediately effective, thanks to the trust received from customers who have believed and still believe in the entrepreneurial initiative.

In June 2018 we have moved into a new settlement of 1800 square meters, where various classes of goods are assembled, tested and packaged in accordance with the highest quality standards required by the market.

# MARKET AREAS

# **WHAT MAKES US SHOWING UP**

TRETECH is operating from 10 years, always getting heavily on the wealth of experience of IBME staff, a motivated workgroup, proactive and used for years to work following rules and mindset of automotive sector (notoriously one of the most demanding sectors of the market), supporting their customers on any terms of quality, industrialization, logistics.

The Italians partners are a group of professionals, working from over 30 years in the manufacturing sector (automotive and others), playing key roles in the various business functions.

We always operate with the belief that the satisfaction of our customers, and therefore our success, depends on our dynamism, flexibility and efficiency.

## **ENDING UP ....**

To relocate own manufacturing activities to "low cost" countries is, from years, a widespread practice for thousands of Italian companies.

Who decide to invest on it, relies on significant savings over their production costs, but also knows that, almost always, will have to cover a range of problems relating to the management of logistics and quality, facing production delays, non-conforming lots, hard understanding with local interfaces ....

## **WITH TRETECH YOU WON'T NEED TO ACCEPT SUCH COMPROMISES.**

From beginning you'll have people who will respond in your language, used to apply standards of production and every related handling, at least as severe as yours, people who will always wish to be a solution for you, and not a problem.
